

# 2013-2014 Projected Individual Flight Training Costs

These are the projected costs for flight courses for the 2013-2014 school year based on anticipated rates. Course costs are based on the average number of hours it takes a student to complete the course, and may vary from student to student according to their capability and motivation. **Additional aircraft fuel surcharges may be added if fuel prices rise above anticipated amounts.** Financial aid may be available to assist with these costs, but applying for aid must be done well in advance. Flight costs are in addition to tuition, room and board.
